|---|---------------|
| Alberta Health Services Designated Senior Living Terms | Notes: |
| Independent - Individuals entering our retirement communities at this level do not require approval from Alberta Health Services. Residents live independently and may utilize the buildings' activities, amenities, and services. | |
| Home Care - Home Care helps people maintain independent lifestyles for as long as possible. Home Care offers professional support services like nursing, physiotherapy, occupational therapy, social work and rehabilitation, and personal support services such as bathing and medication administration. Alberta Health Services is responsible for determining an individual's need for home care and Lifestyle Options delivers the needed services. | |
| Supportive Living - Various seniors' facilities, retirement centres and lodges. Supportive living combines housing and "hospitality services" (meals, housekeeping, laundry etc.). The facility operators are responsible for coordinating and arranging hospitality services and may also coordinate or provide personal care and other support services. Seniors who are fairly independent, with or without the help of home care, are a good fit for this level. | |
| DSL3 Designated Support Living - Seniors with health needs that, in the case manager's assessment, require 24 hour personal care and support are eligible for placement in a Designated Supportive Living 3 (DSL3) facility. Seniors in DSL3 have higher care needs that cannot be scheduled, but can still use a call system to get the help they need. Health Care Aides are on site 24 hours every day to provide support and personal care. | |

DSL4 - Designated Support Living - Seniors with complex medical needs that require 24-hour on-site professional nursing and high levels of personal care and support (in the case manager's assessment). Care is managed on-site by a Licensed Practical Nurse (LPN) under the direction of a home care registered nurse (RN) and delivered by health care aides. Alberta Health Services administers case management services, professional health services including 24-hour on-call RN services.

DSL4D - Designated Support Living 4D - A secure, home-like environment with 24/7 care for residents experiencing cognitive decline. SL4D care teams include licensed practical nurses and health care aides. Registered Nurses provide additional care support on a consultative basis.

Long Term Care - To be placed in a nursing home or auxiliary hospital, seniors are assessed by AHS as having serious, chronic and/or unpredictable medical conditions that require access to registered nurses able to respond immediately on a 24 hour basis.
